

Lab Guide : Web Designing-1

1. Create a simple HTML page title as "**My First Web Page**". Inside the `<body>` tag:
 - Add your name in `<h1>`
 - Add your class in `<h2>`
 - Add a short paragraph about yourself.
 - Use text formatting tags : Make one word **bold** (`<b>`), make another word *italic* (`<i>`), Add a line break (`<br>`) and Use `<hr>` to add a horizontal line
2. Create a web page with:
 - An **unordered list** of your favorite hobbies.
 - An **ordered list** of your favorite movies.
 - Add a **hyperlink** to:
 1. Google (<https://www.google.com>)
 2. College website
 - Insert an image:
 - Use an image from local folder (``)
 - Set width and height
3. HTML Code design Time Table using rowspan and colspan.

Time Table					
Hours	Mon	Tue	Wed	Thu	Fri
	Science	Maths	Science	Maths	Arts
	Science	Maths	Science	Maths	Arts
	LUNCH				
	Science	Maths	Science	Maths	Project
	Science	Maths	Science	Maths	

4. Design given image using HTML and CSS.

July 2026						
MON	TUE	WED	THU	FRI	SAT	SUN
		1	2	3	4	5
6	7	8	9	10	11	12
13	14	15	16	17	18	19
20	21	22	23	24	25	26
27	28	29	30	31		

Lab Guide : Web Designing-1

5. Html code to design multiple list.

Certificate Courses

- CCA
- DTP
- TALLY

NIELIT Courses

- I. CCC
- II. O Level
- III. A Level

Diploma Courses

- A. DCA
- B. ADCA
- C. DFA
- D. DDNT

Programming Courses

- 11. PYTHON
- 12. Java
- 13. C Programming
- 14. C++
- 15. Data Structure using C

Web Designing Courses

- 1. HTML
- 2. CSS
- 3. Bootstrap

6. Create page named 'My Portfolio' Use semantic HTML5 tags to create a layout

using `<header>`, `<nav>`, `<main>`, `<section>`, `<footer>`

- Create Section Education, Experience & Projects.
- Add content in each section
- Add your image on the home page and useful links to your Github/Linkdin profiles, Also improve page layout.
- **Add multimedia:**
 - 1. Embed an **audio file** (`<audio src="audio.mp3" controls>`)
 - 2. Embed a **video file** (`<video src="video.mp4" controls width="300">`)

7. create **page** `index.html` should have the title "**My Styles Demo**" and include:

- A heading (`<h1>`), and paragraph with some sample text
- Apply styles using:
 - **Inline CSS:** Change the font color and background color of the `<p>` tag.
 - **Internal CSS** (using `<style>` in `<head>`):
 - Change the font size of `<h1>`
 - Center the paragraph text
 - Change the button color and add padding
- The **second HTML page** (e.g., `about.html`) should also contain a heading and paragraph.
- Create a **common external CSS file** (`style.css`) and link it to both pages to:
 - Set a common font-family
 - Apply a uniform background-color to both pages

8. Write a HTML code using CSS to create a job application form having following details.

- Personal Information (First Name, Middle Name, Last Name, Gender, address & phone number)
- Education Details (10th, 12th, Graduation & others)
- Experience (in months)

9. Create Tours and Travels Inquiry form that contains HTML Controls to input Name, Mobile_no, City(use dropdown list for selecting the city), Travel Date and Submit.

Lab Guide : Web Designing-1

Apply external CSS for:

- Font styling
- Input tags border radius
- Form alignment in the center of the page
- Save your CSS file as `style.css`

10. Create a user registration form with the following:

- Full Name, Email, Password, Confirm Password
- Submit Button
- Use the `action` attribute to send the data to `register.html` using `method="post"`

11. Create an Online Food Order Form:

- **Fields:** Customer Name, Mobile Number, Food Item (dropdown), Quantity, Delivery Address (textarea), Payment Method (radio)
- Use `action="order_summary.html"` and `method="post"`
- **Apply external CSS:**
 - Font family: Arial
 - Inputs should have rounded borders
 - Set a max-width for the form and center it on the page

12. Make a Job Application Form:

- **Fields:** Full Name, Email, Phone, Gender, Position Applied For (dropdown), Upload Resume (`<input type="file">`)
- **CSS:** Style submit and reset buttons
Style the heading with different font and color

13. Create a 2-column form layout using Bootstrap grid:

- Left column: Form, Right column: Image or any static text

14. Create a following grid structure:

Blog:

15. Create a dashboard layout using nested Bootstrap grids:

Top bar (full width), Left sidebar (col-md-3), Right content area (col-md-9)

16. Create a student record table with the following:

- Use `.table`, `.table-striped`, `.table-bordered`, and `.table-hover`
- Apply table contextual color classes like `.table-success`, `.table-danger`

Lab Guide : Web Designing-1

17.Display different alert messages on a webpage:

- Use `.alert`, `.alert-success`, `.alert-danger`, `.alert-warning`, `.alert-info`

18.Create a feedback form using Bootstrap form controls:

- Use `.form-group`, `.form-control`, and proper labels
- Include text, email, dropdown, and textarea

19.Create a "Course Enrolment Form" using Bootstrap Grid

- **Fields:** Student Name, Email, Course (dropdown), Time Slot (radio), Mobile, Submit
- Bootstrap Grid Layout:**

- Use `.container`, `.row`, `.col-md-6`
- Use `.form-group` or `.mb-3` for spacing
- Align button using `.text-center`
- Submit button styled with `.btn btn-success`

20.Display an image gallery using Bootstrap:

- Use `.img-thumbnail`, `.img-fluid`, and `.rounded-circle`

21.Use Bootstrap Media Object component to display:

- A profile picture on the left
- Name and short bio text on the right side

22.Create a product listing page with pagination controls at the bottom:

- Use `.pagination`, `.page-item`, `.page-link`

23.Create Responsive (use bootstrap) Sign Up form / Registration page that includes at least following fields: Full Name, User Name, Password, Confirm Password, Address (Use Textarea), Gender (Use Radio button), Mobile Number, Email Id, City, State (Use Dropdown), Submit and Reset buttons.

Use JavaScript to validate following: **(April-2025)**

- (1) User name (Must not be blank)
- (2) Password and confirm password must be same.
- (3) Mobile number (must be 10 digits)

24.(A)Create responsive Password Validation Form using HTML and Bootstrap. Use JavaScript to do the following validations. Password must contain: **(April-2025)**

- (a) Capital Letter(s) and Lower case letter(s)
 - (b) Digit(s)
 - (c) Length is minimum 8 characters
- (B) Password and Confirm Password must be same
